</table>
**OSHA 10** (10 Hours) – This course will cover the required material for participants to receive the OSHA 10 certification required by Missouri law for employees working on state or local government contracts.

**Competent Person** (4 Hours) – OSHA requires a competent person to inspect each jobsite for hazards prior to starting a project and as conditions substantially change. This course provides competent person certification and will give attendees detailed training on the identification and remediation steps necessary for safe jobsites.

**Locator Training** (4 Hours) – This course will examine the theory and fundamentals of locating underground utilities. In addition to classroom instruction, participants will receive hands-on guidance in the field from a locating expert.

**Overhead Powerline Safety** (2 Hours) – Overhead power lines, like their underground counterparts, are equally dangerous. This course will explore Missouri law specific to overhead power line safety and provide an informative and interactive display for participants to see the risk associated with unintentional contacts.

**Directional Drilling Safety** (2 Hours) – For a variety of reasons, directional drilling activity in Missouri has increased exponentially. Join drilling experts to learn about the safe operation of boring machines and how to overcome common challenges.

**Educating the Public** (2 Hours) – For utilities, public education is an ongoing task. From ensuring awareness of consumer safety to using social media to proactively inform the public, this course will provide a comprehensive perspective on public relations to the benefit of your organization.

**Investigating Damages** (2 Hours) – Unfortunately damage to underground utilities occurs. Inadequate investigations of those damages often leads to further complications. Join damage investigation experts to learn about how you can investigate damages thoroughly to support your claims.

**Pipeline Safety** (2 Hours) – Although pipelines are extraordinarily safe, unintended damages can be catastrophic. Learn about what you can do to prevent damage to pipelines and what the appropriate steps are when a damage does occur.

**Trench Safety** (2 Hours) – Trench collapse has become an increasing concern among contractors and utilities alike due to the rising number of fatalities. Learn what you can do to prevent collapse, what OSHA requires in trenches, and how trench rescues are performed.

**Blasting Safety** (1.5 Hours) – The use of explosives in excavation is becoming more common. This course was designed to provide an understanding of compliance and the many considerations surrounding blasting.

**Internet Ticketing Training** (1 Hour) – Prefer to submit your locate requests online rather than the telephone? This class provides the training certification necessary to help you put down the phone, log on, and become your own Missouri One Call operator.

**Missouri One Call System** (1 Hour) – As a crucial component of damage prevention, the Missouri One Call System and related laws are more important than ever. Attend this course to find out what is required and what you can do to make the process as user-friendly as possible.

**Hydroexcavating** (1 Hour) – As utility corridors become more congested, more organizations are turning to alternative methods of excavating to avoid utility damages. Excavators and utility personnel are encouraged to participate in this demonstration to learn the value of hydroexcavation as an alternative to trenching.

**Changing Behavior with Reports** (1/2 Hour) – Reports provided by Missouri One Call can be remarkably useful in identifying problematic and chronic abusers of the locate request process. This course is designed to provide utilities with information to help support investigations and demonstrate necessary changes to damaging behaviors.
Call before you dig!
1-800-Dig-Rite or 811

Safe and reliable gas service is very important. Excavation related damages pose a great risk to utility service and public safety. When Laclede Gas and contractors work together cooperatively, excavation can be safely accomplished through four simple steps:

- **Make the Call.** Call 1-800-DIG-RITE or 811 and request that your project area be marked.
- **Wait the required time.** Give utilities at least three working days to mark underground facilities.
- **Respect the marks.** Laclede’s gas facilities are marked in yellow paint and/or flags. Never dig without marks on the ground.
- **Dig with care.** Verify the pipeline location and depth prior to digging.

For questions or suggestions on how to make the excavation process more effective, please contact Bo Mietek in Laclede’s Damage Prevention Department at (314) 658-5552.

**CALL OR CLICK 3 DAYS BEFORE YOU DIG!**

LESS TRIPS TO THE TRUCK

Increase your productivity and efficiency with Krylon Industrial's newest breakthrough – The TallBoy™.

The Tallboy™ provides 22 oz. of paint (almost 30% more than the 17oz. can) which not only means less trips to the truck, but also less cans to dispose of and less product to carry.

Celebrating its 45th anniversary and continuing to serve the construction industry

SITE Improvement Association is proud to represent area contractors performing Asphalt Paving, Concrete Construction, Earthmoving and Excavating, Highway/Bridge Construction, Sewer and Utility Construction, Specialty and Landscaping.

SITE is also a proud sponsor of:

It’s Fast....it’s free......it’s EZ!

EZ Bids has become a useful tool to SITE contractors working in the construction industry. We provide our members with an easy and reliable way to check bid notifications of public construction projects from in and around the St. Louis area. We update the website frequently to offer current information including the list of plan holders and the project bid results. We now offer a weekly email notification listing of newly added projects that are posted on the website. And it’s free! If you are a SITE contractor and would like to receive these weekly notices or need login information, please contact SITE’s office (314) 966-9250.

Do you move dirt? We do!

LICA has been serving contractors in Missouri for over 60 years, providing our members with the tools they need to work smarter ... not harder. Below are a few of our contractor benefits:

LICA Safety Insurance Group
A competitive insurance program, underwritten by United Fire & Casualty, for your business and work comp needs

LICA Safety Compliance Program
A written safety program for your business

Buyer’s Group for Oil, Lubricants and Tires
Not only a discount on oil, lubricants, and tires ... but a $2,500 savings on a membership in the PetroLee Group!

Accidental Death & Dismemberment Insurance
A complimentary $50,000 AD&D policy with the ability to purchase coverage for your employees and family at reduced rates

Education
Through the Missouri LICA and National LICA newsletters, the LICA Contractor magazine, Winter Convention, Summer Meeting, and District Meetings, our members are kept up-to-date on regulations, while learning how to work smarter - not harder!

www.pdigm.com
Precision Daylighting Inc. is a Hydrovac Service Company that specializes in safe and efficient excavating, also known as “Soft Dig.” Precision Daylighting hydrovacs are unlike the air-vacs, sewer-suckers, pressure washers, vacuum trucks and other vacuum excavators that many others may have experienced. Precision Daylighting’s hydrovacs are powerful and efficient equipment capable of moving large quantities of earth. They can also cut precise slot trenches and daylight (pot hole) holes to expose buried utility lines. By using Precision Daylighting’s services, the chance of rupturing pipelines, damaging utility cables or severing fiber optic lines is practically eliminated.

Precision Daylighting’s hydrovac services utilize pressurized water and a powerful vacuum system to excavate, pothole, daylight and efficiently expose buried utilities. The water is delivered through a handheld wand to cut through soil, which is simultaneously removed by the vacuum allowing for safe excavation in congested areas and frozen ground with minimal ground disturbance.

Precision Daylighting Inc. Hydrovac Services Include:

- Daylighting (safely exposing underground utilities)
- Utility Exposure (known and unknown)
- Slot Trenching
- Piling Holes (Pliers)
- Pot Holing
- Confined Space Excavation
- Debris Removal
- Culvert Cleaning
- Remote Excavation
- Frozen Ground Excavation
- Pipeline Tie-Ins
- Utility Pole Holes
- Foundation Exposure
- Retention Pond/Catch Basin Clean
- Hydro Excavation
- Utility Anchors
- and Many More

“Safely Exposing Today’s Utilities for Tomorrow’s Future”
Don't ever guess the location of a pipeline. Smart digging means calling 811 before each job.

State law requires you to call 811 or Missouri One Call System at least 48 hours before beginning any excavation or soil disturbing activity.

Pipeline markers indicate the presence of underground facilities. Company personnel must be present when excavating near our pipeline. Contact us by calling 811.

ALWAYS CALL BEFORE YOU DIG

CALL THE NATIONAL 811 “CALL BEFORE YOU DIG” NUMBER, IT’S THE LAW.

A reminder from City Utilities of Springfield, MO

Safety Wrap

Safety Wrap is like a hard hat for your pipe. When pipelines are exposed, they are at their most vulnerable. Simply installing Safety Wrap will protect the pipe and its vital coatings from damage that can occur. It was designed by a contractor with over 50 years of personal experience in the field, and with the goal of protecting pipelines and saving lives.

Effective
Avoid downtime, paperwork and costly repairs by installing Safety Wrap over exposed pipe during excavation and maintenance. Eliminating the cost of a single cut-out or repair will more than pay for the wrap.

Visible
The fluorescent orange color of Safety Wrap adds an additional level of protection.

Simple
Installing single piece safety wrap is no more difficult than putting a key on a key ring.

Reusable
Safety Wrap can be used again and again. The first prototype pieces developed over a decade ago are still in use today.

Protect your pipeline. Protect your workers. Protect the public.

The very best way to protect exposed pipelines

• Acts like a hard hat for your pipeline
• Temporary wrap protects coatings and pipe from accidental nicks, scrapes or dings
• Increased visibility warns operators to keep their distance
• Durable enough to take a direct hit without being punctured or torn
• Installs in minutes

SafetyWrapCorp.com | 800.922.4343
Companies with underground pipelines, assets, and facilities are committed to safe excavation processes. So are we…

CeleritasWorks™ is a GIS development company that is committed to providing patented, web-based tools for the underground damage prevention community.

Those tools include the Public Awareness Manager™ (pipeline, asset & document management)...

And the Ticket Manager™ (dig ticket & locate request management), and the Online Training Center™, containing videos, on-line drills, and presentations dealing with excavation and pipeline safety.

For more information, Call us at 913-491-9000 Email us at info@celeritas.com Or visit us at www.pipelineawareness.com
3M™ Dynatel Locators & 3M™ Electronic Marking System

- Perform cable/pipe/fault and marker locating with one easy-to-use unit
- Read and write information directly to RFID markers
- Interface with GPS/GIS mapping systems

Prevent damages to buried pipelines and utilities
Call Before You Dig!

The Plan is Simple
1. Notify the Missouri One Call System by dialing 811 at least two working days before your planned excavation is scheduled to begin.
2. Wait the required amount of time.
3. One of our trained technicians will mark the location of the pipeline at no cost to you.
4. Respect the pipeline markers.
5. Dig with care.

Mission Statement:
To lead the development of increased communication, cooperation, and understanding between pipelines operating in Missouri on pipeline industry issues.

The Pipeline Association of Missouri (PAM) was formed in 2001 as a collaborative outreach effort amongst Missouri pipeline operators to ensure a common and consistent message is communicated to emergency response personnel and the communities we serve.

PAM sponsors annual pipeline awareness & education meetings throughout the state, beginning in April and running through June.

Please visit our website for more information regarding upcoming training opportunities.

Buckeye Partners, L.P.
Our Business

Buckeye Partners, L.P. is a publicly-traded master limited partnership (NYSE: BPL) that provides mid-stream energy logistics services. Buckeye owns and operates one of the nation's largest independent petroleum products common carrier pipeline networks providing refineries, wholesalers, marketers, airlines, railroads and other commercial enusers with dependable, all-weather transportation of refined petroleum products. The Partnership transports refined products by pipeline principally in the Northeastern and upper Midwestern states. Buckeye also operates and maintains pipelines that it does not own, primarily in the Gulf Coast region, under contracts with major oil and petrochemical companies. The combination of experienced and responsive professional staff, technical expertise and modern transportation facilities has earned the Partnership a reputation for providing high-quality, safe, reliable and efficient pipeline transportation services.

In addition to pipeline transportation services, Buckeye provides terminaling, storage and refined product distribution services. The Partnership owns more than 100 refined petroleum products terminals with an aggregate storage capacity of over 69 million barrels, and owns and operates a major natural gas storage facility in California. Our Buckeye Energy Services subsidiary is one of the leading independent fuel distributors in the Mid-Atlantic region. In addition, the Partnership is the largest stockholder of West Shore Pipe Line Company and owns a 75 percent interest in WestPac Pipeline-Memphis LLC.

Commitment to Service Excellence

Buckeye is committed to providing quality logistics services to its customers by continuing to grow and diversify its service offering. As the petroleum supply and distribution functions continue to become more complex and critical, customers can rely on Buckeye to provide unsurpassed service. Buckeye's strengths are its strategic asset base, sound financial background, and dedicated employees. We look forward to undertaking the challenges in our expanding role as a leading supplier of energy logistics services, and welcome the opportunity to continue to serve our valued customers.

AIR VACUUM EXCAVATION & PRIVATE UTILITY LOCATING SERVICES

AIR VACUUM EXCAVATION BENEFITS

• Utility Quality Level “A” in Accordance with
  OSHA 1926.52
• Non-Destructive
  • DCT (Direct – won't harm road base)
  • Safe Digging – air will not cause cable
    fraying or fracturing
• Reliable and Efficient
  • World’s most powerful air suction system
  • Dig in all soil conditions
  • eliminates a Trenchless!
  • Self-contained for test, easy setup
• Environmental
  • No mud/silt, soil, debris or bobcat mess
  • Erosion control, dewatering is included

PRIVATE UTILITY LOCATING BENEFITS

• Utility Quality Level “B” in Accordance with
  OSHA 1926.52
• Safety
  • Protection for workers
  • Environmentally responsible
• Additional Protection
  • Locate utilities on privately owned property
  • Prevent other utilities and utility repair costs
• Efficient
  • Locates utilities faster with state of the art equipment
  • Experienced, properly trained and knowledgeable operators
